RECENT PROJECTS

SKATESHOP LIVE LINK | CODE LINK

- Full Stack E-Commerce Application with Admin Panel built with React, Redux, Spring Boot and MySQL, integrated with Stripe checkout, firebase authentication and Cloudinary service.
- The Java backend acts as REST API to serve data to the React frontend over HTTPS, using Hibernate framework with JPA for the data access layer.
- Integrated custom filter in the Spring Security filter chain to check every request for the firebase JWT bearer token.
- Using the ModelMapper library to enable automatic mapping between DTO and Entity.
- Responsive and adaptive layouts styling with React and Styled-Components.

NOTIONHUT LIVE LINK | CODE LINK

- A Full Stack curated directory of the best notion tools and templates. Built with Next.js, KeystoneJS and PostgreSQL. With headless CMS & GraphQL API powered by KeystoneJS.
- Infinite Scroll with Intersection Observer API, useRef hook and Apollo Client useQuery hook.
- With indeterminate checkboxes from Chakra UI for users to filter tools, making use of Next.js router query and GraphQL variables.
